

Task Details:

Topic of your reel is mentioned in email.

The purpose of giving you this task is to:

1. Boost your skills and knowledge.
2. Put what you've learned into practice.
3. Encourage you to be creative.

Anyone who is watching your reel should get educate, engage, and inspire from content. Please go through below instructions before you start working on your reel:

1. Research and Plan:

- Conduct thorough research on your reel topic; gather relevant information, examples, and visuals.
- Plan the structure and flow of your reel, breaking down the content into concise segments that are easy to understand.

2. Keep It Concise and Focused:

- Keep your reel duration within 30 seconds to 1 minute to make it concise and focused.
- Focus on delivering key information and avoid mentioning too much detail.

3. Use Visual Aids and Examples:

- Prepare faceless reel by adding visuals such as diagrams, charts, or animations to enhance understanding and engagement.
- Provide real-world examples or scenarios to showcase how the SQL concept is applied in practical world.

4. Ensure Clarity in Explanation:

- Use clear and simple language to explain the SQL concept, avoiding technical jargon or complex terminology.
- Break down the topic into smaller segments and provide step-by-step explanations for better understanding.

5. Encourage Engagement:

- Include interactive elements such as questions, polls, or quizzes to encourage viewer engagement.
- Prompt viewers to think critically about the topic and invite them to ask questions or share their thoughts.

6. Create and Share:

- Produce your reel using video editing software or online platforms which are available for free. You can use Canva or any other tool you are comfortable with. Ensure high-quality visuals and audio.

How to Submit:

Submit your completed videos through the provided form by the deadline using the link shared in internship details file. You need to submit video title and the video file.
